A Seminar Report On

***“AUTOMATED TRAFFIC SIGNALS USING REAL-TIME
TRAFFIC DENSITIES”***

Submitted by

POOJA M MULIMANI

USN: 2SR15IS013

Under the Guidance of

Dr. S G Makanur Ph.D

Head of Dept. of ISE

Information Science and Engineering

**Department Of Information Science and Engineering
SRI TARALABALU JAGADGURU INSTITUTE OF
TECHNOLOGY**

RANE BENNUR-581115

2018-2019

**SRI TARALABALU JAGADGURU INSTITUTE OF
TECHNOLOGY**
RANE BENNUR-581115

**DEPARTMENT OF INFORMATION SCIENCE AND
ENGINEERING**

CERTIFICATE

Certified that the Seminar on topic "AUTOMATED TRAFFIC SIGNALS USING REAL-TIME TRAFFIC DENSITIES" has been successfully presented at S T J Institute of Technology by **POOJA M MULIMANI [2SR15IS013]** bearing in partial fulfillment of the requirements for the *VIII Semester degree of Bachelor of Engineering in Information Science and Engineering of Visvesvaraya Technological University, Belgaum* during academic year 2018-2019. It is certified that all corrections/suggestions indicated for Internal Assessment have been incorporated in the report deposited in the departmental library. The Seminar report has been approved as it satisfies the academic requirements in respect of Seminar work for the said degree.

Dr. S G Makenur Ph.D
Seminar Guide

Mr. Mounesh A M.Tech
Seminar Coordinator

Dr. S G Makenur P.hd
Prof. and HOD

Dr. B Shivakumar P.hd
Principal

DECLARATION

I, **POOJA M MULIMANI** [2SR15IS013], student of VIII Semester BE, in **Information Science and Engineering, S T J Institute of Technology** hereby declare that the Seminar entitled **“AUTOMATED TRAFFIC SIGNALS USING REAL-TIME TRAFFIC DENSITIES”** has been carried out by me and submitted in partial fulfillment of the requirements for the *VIII Semester degree of Bachelor of Engineering in Information Science and Engineering of Visvesvaraya Technological university, Belgaum* during academic year 2018-2019.

POOJA M MULIMANI
2SR15IS013

ACKNOWLEDGEMENT

The satisfaction and euphoria that accompany the successful completion of any task would be incomplete without the mention of the people who made it possible, whose constant guidance and encouragement crowned the efforts with success.

I would like to profoundly thank **Management of S T J Institute of Technology** for providing such a healthy environment for the successful completion of Seminar work.

I would like to express my thanks to the Principal **Dr .B Shivakumara** for his encouragement that motivated me for the successful completion of Seminar work.

It gives me immense pleasure to thank **Prof. S G Mekanur** Professor and Head of Department for his constant support and encouragement.

Also, I would like to express my deepest sense of gratitude to my Seminar guide **Dr. S G Mekanur** Head of Department of Information science and engineering for her constant support and guidance throughout the Seminar work.

I would also like to thank the Seminar Coordinator **Mr. Mounesh A** Asst. Prof., Department of Information science and engineering and all other teaching and non-teaching staff of Information Science and Engineering who has directly or indirectly helped me in the completion of the Seminar work.

Last, but not the least, I would here by acknowledge and thank my parents who have been a source of inspiration and also instrumental in the successful completion of the seminar work.

POOJA M MULIMANI

ABSTRACT

The ever-increasing problem of traffic is taking a toll on the commuters' daily routine wherein a significant amount of time of the day is consumed in travelling itself. With expanding movement, the suburbanites are required to stop for longer lengths at activity intersections sitting tight for the green signs bringing about loss of time and fuel. To check this issue, this paper proposes a brilliant activity control framework which powerfully changes the signs continuously by breaking down and looking at the movement at different intersections. The densities at different sides are compared using the K-Means Clustering algorithm. The comparison output is obtained and fed back to the traffic signal devices which respond by changing signals in an optimized manner.

INTERACTIONS

Why I have chosen this seminar?

To avoid the loss of time and fuel in traffic junction.

What are the technologies studies for the seminar?

K-Means Clustering , Real-Time system , Map-Reduce.

What I have learnt from the seminar?

How the existing traffic System can be maintained using automated traffic signal densities.

What the audience can learn from the seminar?

The main reason in this technic , Save fuel consumed during the pauses at traffic-signal junctions , considering that the drivers keep their engines on during wait-time
